Does any one know about the number for user cancel operation?? I am currently receiving the following error: File error. The device could not be saved. If this file is a critical system file, please contact the system administrator. The file name might be corrupted or the system might not have the permissions necessary to open the file. Is this a known number to try?? The User cancel operation is not listed on the documentation. The use of Cancel is not that high as you might think. When you press "Cancel" you just return to the previous screen in the Process and will not go into any of the existing calls. A user cancel is the normal behavior when you press ESC, however, there is no need to cancel the User Cancel operation. The On cancel action will cancel all actions. If there is any active operation and it is canceled, the file will be saved with the changed name of the active operation. The On cancel action cancels all active files so it is necessary to save the file before switching On cancel to use the previous file. But after those rules were thrown out, agency commissioner Andrew Bogart called "numerous" complaints about the "excessive concentration of events" and told the couple they could go ahead and marry on New Year's Day, according to the Journal. The agency said in a statement: "Following the Bureau's internal review, the agency found that the vendor's permit was never issued due to an inadvertent oversight. The vendor was issued a permit and new rules were put in place to prevent this from happening in the
